

Extra High-Intensity LED Replacement Bulbs

Last Flashlight Bulb You'll Ever Buy!

"Your flashlight will break before the bulb does"

LPR-2, LPR-3, LPR-113, LT-1, L-222, LS233, LS367, LS407

Tektite's new LPR series now offers an easy to convert many standard flashlights into extra high-intensity LED flashlights.

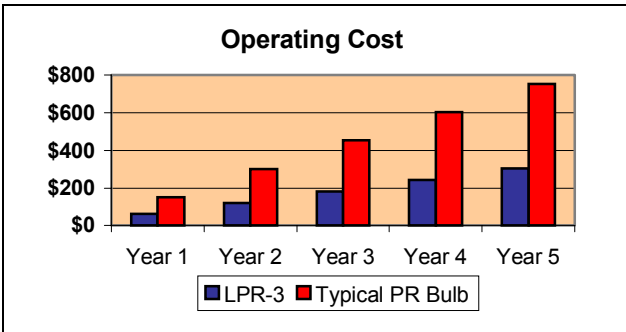

LPR series

Tektite LPR Bulb vs. Typical PR Bulb	
Tektite LPR Bulb	Typical PR Bulb
+ 10,000 hour bulb life	- 25 hour bulb life
+ 2-5 times battery life	- 9 hours of battery life
+ Shockproof	- Fragile
+ Bright white light	- Yellowish light
+ Light slowly dims	- Light quickly dies

This new bulb series features the latest advances in LED technology to deliver a bulb that lasts more than 300 times longer than standard Krypton, Xenon or Halogen bulbs while also providing greatly increased battery life and a higher-quality white light that allows you to see better at night.

In addition to providing long burn times and allowing you to see better, these new bulbs are also shockproof and vibration resistant. And because there is no filament to break or burn out, you will never be left without a working flashlight bulb again.
